### **Examiner's Amendment**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Rich Bucher ( Registration number: 57,971) on 11/20/2006.

3. The following claims had been amended:

(I) In claim 17 :

(i) lines 6 -7, replace " wherein the command schema is configurable to permit reconfiguration of individual commands in the set of command " with - - wherein the command schema comprises:

an alias class to define alias instances, each alias instance representing a command within the set of commands;

a verb class to define verb instances, each verb instance representing behavior available through an alias instance;

a parameter class to define parameters accepted by a verb instance;

a format class to define format instances, each format instance having a list of properties to be displayed through an alias instance;

Art Unit: 2194

a property class to define property instances, each property instance representing a property from a property list;

a connection class to define connection instances, each connection instance representing connection parameters used by an alias instance to establish a connection to the target schema object model;

a qualifier class to define qualifier instances, each qualifier instance representing constraints on elements of an alias instance;

a localized string class to define localized string instances, each localized string instance representing a text localization for translating text into a localized language; and

a see-also association to associate an alias instance with other related alias instance; - -.

(II) Cancel claims 23.

(III) In claim 24:

(i) line 17, replace “.” with - - ;

wherein the command schema comprises:

an alias class to define alias instances, each alias instance representing a command within the set of commands;

a verb class to define verb instances, each verb instance representing behavior available through an alias instance;

a parameter class to define parameters accepted by a verb instance;

Art Unit: 2194

a format class to define format instances, each format instance having a list of properties to be displayed through an alias instance;

a property class to define property instances, each property instance representing a property from a property list;

a connection class to define connection instances, each connection instance representing connection parameters used by an alias instance to establish a connection to the target schema object model;

a qualifier class to define qualifier instances, each qualifier instance representing constraints on elements of an alias instance;

a localized string class to define localized string instances, each localized string instance representing a text localization for translating text into a localized language; and

a see-also association to associate an alias instance with other related alias instance; - -.

(IV) Cancel claim 25.

(VI) In claim 32:

(i) line 1, replace “computer-readable media” with - - computer-readable storage media - - ;

(ii) line 3, replace “of claim 27” with - - comprising:

receiving a command from a user that was formulated as an instant request by the user at a management station through an interactive command line interface;

Art Unit: 2194

fetching an alias for the command, wherein the alias is an instance of an alias class and is the primary class in a command schema, and wherein the command schema additionally includes:

- a verb class to define verb instances, each verb instance representing behavior available through an alias;

- a parameter class to define parameters accepted by a verb instance;

- a format class to define format instances, each format instance having a list of properties to be displayed through an alias;

- a property class to define property instances, each property instance representing a property from a property list;

- a connection class to define connection instances, each connection instance representing connection parameters used by an alias to establish a connection to the target namespace;

- a qualifier class to define qualifier instances, each qualifier instance representing constraints on elements of an alias;

- a localized string class to define localized string instances, each localized string instance representing a text localization for translating text into a localized language; and

- a see-also association to associate an alias with other related aliases;

interpreting the command based on the alias and the current operating environment of the command line interface;

Art Unit: 2194

executing the command as one or more WMI API calls against a targeted namespace representing at least one selected target system that is accessible via a network;

receiving WMI data in XML form;

applying an XSL style sheet format the WMI data; and

presenting the WMI data through the command line interface.

(V) Add claim 38:

(i) Claim 38: A management application as recited in claim 17, wherein the command schema is configurable to permit reconfiguration of individual commands in the set of commands.
